

ROAD

*construction
services*

Statco is a **progressive, fast-growing company** with next gen. Solutions. The *Statco* Construction division provides **quality turn-key services** in the public and private markets. We embrace the challenges of sustainable development, and perform each job with **pride** and **creativity**.

Statco delivers **high value, cost effective, bespoke** range of products and services to address road construction needs of our clients around the world. We can take your job – **no matter the size** – from the design stage to the final layer of asphalt!

We provide refurbished road building products and equipments, viz:

- ✓ **Road Building International (RBI) 81 stabilizer**
- ✓ **Boulder Buster TM.**

1 RBI-81 Natural Soil Stabilizer is a unique and innovative product that stabilizes a wide spectrum of soil, efficiently and cost-effectively.

- **RBI Grade 81** is an inorganic hydration activated, powder-based Non-toxic and an environment-friendly stabilizer, which reacts with soil particles to create layers that are interconnected, through a complex inter - particle framework.
- **RBI Grade 81** provides optimum solution for processing and stabilizing a wide range of soil types and under different soil conditions, vis-a-vis: Clay, silt, sand and gravel based soils conditions – for road construction.
- **RBI Grade 81** is certified under BS EN ISO 9001:2000 and a host of international certifications
- **Drastic reduction** in road construction time and cost - saving.

Statco's dynamic solution specializes in newly constructed **asphalt and unaspalted** road building.

2 BOULDER BUSTER – cutting -edge solution in rock breaking!

The Boulder Buster TM is the first choice in standby rock breaking equipment:

- ◆ **Compact, cost-effective** and portable equipment
- ◆ **Effectively operates**, splits and breaks rocks & boulders
- ◆ Very useful in **demolition of concrete structures**
- ◆ Operates conveniently, with a **low operating costs**
- ◆ Safe and Energy **efficient**
- ◆ **No damage** to structures and equipment
- ◆ **Very low concussion** and **Insignificant toxic gases**
- ◆ **Low velocity fly rock** and **very little scatter**
- ◆ **No blasting license required**

BOULDER BUSTER TM is used in Secondary breaking in mines and quarries, Civil construction, Demolition and Site clearing, Swimming pool excavations, Trench digging, Farming operations, Dimensional stone dressing & sizing, and Over-sized rocks in crushers.

Statco strives to be socially, **economically and environmentally responsible** in every work undertaken, to safeguard the needs of future generations. As one of India's prominent suppliers of building material solutions, *Statco* is committed to sustainable development across the business.
